

Portable Animal Intensive Care Units (ICUs) by ThermoCare®

ThermoCare® Portable Animal Intensive Care Units have been used successfully by veterinarians, breeders and pet owners in aid of sick, recovering, or chronically ill animals, neonates and nursing mothers for over thirty years. Many original units, made in the late 1970's and early 1980's, are still in use today. The revolutionary heated lining of the water jacketed warmer, as well as the air within the warmer unit, are naturally circulated by convection currents. Safe, reliable, and versatile, ThermoCare's® many options will meet the ever-changing needs of your diverse animal patients.

What the ThermoCare Portable ICUs Can Do:

- **Safely Heat** post-operative patients and all cases of hypothermia without "hot spots" in a "safe heat" environment.
- **Humidify** the internal atmosphere; operating the humidifier from an oxygen line, air compressor or oxygen generator.
- **Nebulize** the internal atmosphere, without condensation; operated from an oxygen line or our optional air compressor.
- **Medicate** patients in lower respiratory stress with a nebulized mist of 1-3 micron size antibiotic particles.
- **Administer Oxygen** with a humidifier or nebulizer to moisten the atmosphere.
- **Birth, Brood or Whelp** hypothermic newborns with the "safe heat" of a water-jacketed warmer and cage cover.
- **Incubate** eggs or newborns needing controlled heat therapy, oxygen and/or medicated nebulization after birth.

Choosing the Right Unit for Your Needs

From a Portable Intensive Care Unit to an Oxygen Cage to a Post-Operative Recovery unit, the Warmer can be customized to fit the size and needs of your animal patients. This guide and our sales rep will help design a unit to best fit your needs:

Size	Warmer Base (only)†	Dome Cover (only)†	Flat Cover (only)†	Cage Cover (only)†	Unheated Unit†
Small	#W-1 \$1098.00	#D-1 \$899.00	#F-1 \$899.00	#C-1 \$85.00	#NTC-2 \$625.00
Medium	#W-2 \$3860.00	#D-2 \$2120.00	#F-2 \$1800.00	N/A	#NTC-3 \$950.00
Large	#W-3 \$4370.00	#D-3 \$2570.00	#F-3 \$1960.00	N/A	#NTC-4 \$1275.00

Warmer Base

Figure 1: Domed Cover - for administering oxygen, humidity and nebulization in combination with heat; accommodates animals up to 20 pounds (small size) or up to 80 pounds (medium/large sizes).

Figure 2: Flat Cover - for administering oxygen, humidity and nebulization in combination with heat for rodents, reptiles, eggs, and newborns

Figure 3: Cage Cover - when only warmth and containment are needed

Figure 4: Unheated Unit - when warming is not an issue, ideal for in-home care, an economical alternative to a heated unit, provides an affordable way to administer humidity, oxygen, and/or medicated nebulization treatments
